Mechanicam vero duplicem Veteres constituerunt: Rationalem quae per Demonstrationes accurate procedit, & Practicam. Ad practicam spectant Artes omnes Manuales, a quibus utique Mechanica nomen mutuata est. Cum autem Artifices parum accurate operari soleant, fit ut Mechanica omnis a Geometria ita distinguatur, ut quicquid accuratum sit ad Geometriam referatur, quicquid minus accuratum ad Mechanicam. Attamen errores non sunt Artis sed Artificum. Qui minus accurate operatur, imperfectionior est Mechanicus, & si quis accuratissime operari posset, hic foret Mechanicus omnium perfectissimus.

NEWTON

La généralité que j'embrace, au lieu d'éblouir nos lumieres, nous decouvrira plutôt les véritables loix de la Nature dans tout leur éclat, & on y trouvera des raisons encore plus fortes, d'en admirer la beauté & la simplicité.

EULER

... ut proinde his paucis consideratis tota haec materia redacta sit ad puram Geometriam, quod in physicis & mechanicis unice desideratum.

LEIBNIZ

The ARCHIVE FOR RATIONAL MECHANICS AND ANALYSIS nourishes the discipline of mechanics as a deductive, mathematical science in the classical tradition and promotes pure analysis, particularly in contexts of application. Its purpose is to give rapid and full publication to researches of exceptional moment, depth, and permanence.

Each memoir must meet a standard of rigor set by the best work in its field. Contributions must consist largely in original research; on occasion, an expository paper may be invited.

English, French, German, Italian, and Latin are the languages of the Archive. Authors are urged to write clearly and well, avoiding an excessively condensed or crabbed style.

Manuscripts intended for the Archive should be submitted to an appropriate member of the Editorial Board.

CONTENTS OF VOLUME 19

	Page
ARIS, R., Prolegomena to the Rational Analysis of Systems of Chemical Reactions	81
ARONSON, D. G., Isolated Singularities of Solutions of Second Order Parabolic Equations	231
BEATTY, M. F., Some Static and Dynamic Implications of the General Theory of Elastic Stability	167
BRAESS, D., Die Berechnung der Fehlergrenzen bei linearen Gleichungssystemen mit fehlerhaften Koeffizienten	74
CARLSON, D. E., & R. T. SHIELD, Second and Higher Order Effects in a Class of Problems in Plane Finite Elasticity	189
COLEMAN, B. D., R. J. DUFFIN, & V. J. MIZEL, Instability, Uniqueness, and Non-existence Theorems for the Equation $u_t = u_{xx} - u_{xt}x$ on a Strip	100
COLEMAN, B. D., & M. E. GURTIN, Waves in Materials with Memory. II. On the Growth and Decay of One-Dimensional Acceleration Waves	239
COLEMAN, B. D., & M. E. GURTIN, Waves in Materials with Memory. III. Thermodynamic Influences on the Growth and Decay of Acceleration Waves	266
COLEMAN, B. D., & M. E. GURTIN, Waves in Materials with Memory. IV. Thermodynamics and the Velocity of General Acceleration Waves	317
COLEMAN, B. D., M. E. GURTIN, & I. HERRERA R., Waves in Materials with Memory. I. The Velocity of One-Dimensional Shock and Acceleration Waves	1
DRIVER, R. D., Existence and Continuous Dependence of Solutions of a Neutral Functional-Differential Equation	149
DUFFIN, R. J. see COLEMAN, B. D., & V. J. MIZEL	100
FINN, R., On the Exterior Stationary Problem for the Navier-Stokes Equations, and Associated Perturbation Problems	363
GREEN, W. A., The Growth of Plane Discontinuities Propagating into a Homogeneously Deformed Elastic Material. Corrections and Additional Results.	20
GREEN, A. E., & P. M. NAGHDI, Corrigenda to "A General Theory of an Elastic-Plastic Continuum," this <i>Archive</i> 18, 251-281 (1965)	408
GURTIN, M. E., Thermodynamics and the Possibility of Spatial Interaction in Elastic Materials	339
GURTIN, M. E. see COLEMAN, B. D.	239, 266, 317
GURTIN, M. E. see COLEMAN, B. D., & I. HERRERA R.	1
HERRERA, R. I. see COLEMAN, B. D., & M. E. GURTIN	1
HERSH, R., On Surface Waves with Finite and Infinite Speed of Propagation	308

HOCHSTADT, H., On the Determination of a Hill's Equation from its Spectrum	353
HSIEH, P. F., A Turning Point Problem for a System of Linear Ordinary Differential Equations of the Third Order	117
IKEBE, T., Orthogonality of the Eigenfunctions for the Exterior Problem Connected with $-\Delta$	71
LAGNESE, J. E., The Fundamental Solution and Huygens' Principle for Decomposable Differential Operators	299
LOISEAU, J., Le Principe des Variations dit Hamiltonnien est en contradiction avec la Mécanique Analytique	226
MIZEL, V. J. see COLEMAN, B. D., & R. J. DUFFIN	100
NAGHDI, P. M. see GREEN, A. E.	408
NIEMEYER, H., Über die elastischen Eigenschwingungen endlicher Körper	24
RADLOW, J., Note on the Diffraction at a Corner	62
SHIELD, R. T. see CARLSON, D. E.	189
TOUPIN, R. A. see TRUESDELL, C.	407
TRUESDELL, C., & R. A. TOUPIN, Correction to our Paper "Static Grounds for Inequalities in Finite Strain of Elastic Materials," Archive for Rational Mechanics & Analysis, Volume 12, pp. 1-33 (1963)	407
